

## **NYSED-BPSS LICENSED PRIVATE CAREER SCHOOLS APPROVED TO OFFER THE BARBER INFECTIOUS DISEASE/HIV COURSE**

The New York State Education Department approves barbering schools and courses. NYSED's database lists all approved infection control courses. The infectious disease/HIV course is a requirement for Barber/Barber Apprentice applicants. Please note, however, that the search must be done by selecting CURRICULUM from the drop-down menu and then typing in the name of the curriculum. Different and partial search terms may be used, for example: HIV course, Infection Control, Infection, Infectious, Barber, Transmission, etc. to locate the courses. Any of the courses listed will meet the NYS DOS barbering licensure requirement. Those needing to complete this course may contact the school of their choice for scheduling and course availability. You may contact NYSED-BPSS Curriculum at [BPSSCurriculum@nysed.gov](mailto:BPSSCurriculum@nysed.gov) for further information.

Please note that some schools are marked correspondence course or online course. Schools approved to offer the course through correspondence will mail the course to the applicant to complete. Courses not identified as correspondence or online are offered in a classroom environment.
