

Schools approved to offer the Barber Infection Control/HIV Course

The following Schools/organizations have been approved to offer the Barber Infection Control/HIV course which is a requirement for Barber/Barber Apprentice applicants. Those needing to complete this course may contact the school of their choice for scheduling and course availability.

Disclaimer: Please be advised that the New York State Education Department approves barbering schools and courses. The following list may contain approved schools that no longer provide the program; it may also be incomplete and may not list recently approved courses which have not yet been relayed to DOS (Licensing Division) by NYSED. For the most up to date infection control course offerings for barbers, you may search NYSED's database by using the following link:

<http://eservices.nysed.gov/bpss/bpsspublic/BPSSPublicSearch.do>

Note: NYSED's database lists all approved infection control courses. Please note, however, that different search terms must be used (for example, HIV course; Infection Control, etc.) to locate the courses. Additionally, the course should be one that is approved to meet the barbering licensure requirement. You may contact NYSED-BPSS at 518-474-3969 for further information.

Please note that some schools are marked **correspondence course** or **online course**. Schools approved to offer the course through correspondence will mail the course to the applicant to complete. Courses not identified as correspondence or online are offered in a classroom environment.
