#### **II. DEPARTMENT REPORTS**

A. Enforcement Update – E. Delaney provided an Enforcement report. He stated that the annual salon inspection program started in July 2021 and includes metropolitan areas such as New York City, Long Island, Buffalo, Albany, and Syracuse. He mentioned that while conducting these inspections, Enforcement is looking for salons that are operating with a violation and paying special attention to whether salons are complying with the ventilation requirement. E. Delaney explained that the law requires all salons with nail specialty services to have a ventilation system installed at manicure and pedicure stations. E. Delaney stated that salons licensed before October 3, 2016, were given until October 3, 2021, to install these systems. He mentioned that after having the system installed, salon owners will need to have a ventilation certificate

completed by the installer. He added that if violations are found during the inspections, salon owners will be provided with the opportunity to cure the violation by providing proof of correction by email; if the proof is acceptable, then the salon owner will not need to attend a hearing regarding the violation thereby avoiding fines and other penalties. He concluded his reported by stating that there has been a good response by salon owners with a good number taking advantage of the opportunity to correct their violations.

B. Processing Report – E. Lupe reported on the provided July 2020 and July 2021 licensing statistical reports.
